WHAT TO EXPECT

SURVIVE THE WARD

Hear her before you see her
She breathes in the dark. Headphones show you which side she is on.

Hide, do not run
Under beds, in lockers, behind closed doors. She is as slow as you are patient.

Two floors and a cave
A fire-lit stairway joins the upper floor to the ground floor.

A new house every run
Items, furniture, hiding places and her starting room all change.

Your mind is a resource
Sanity drains in the dark. Lamplight and torches steady you.

Play with your hands
Optional webcam gestures and a finger snap to throw bottles (run locally).
